

Biology Department: Fall Seminar Series

Thursdays, 12:20 – 1:30, Rhoades 125

Refreshments Served Before Seminars!

Thursday, August 27th

Dr. Jim Petranka, UNC Asheville. Effects of road salts on the composition of seasonal pond communities: Can the use of road salts enhance mosquito recruitment?

Thursday, September 17th

Dr. Howie Neufeld, Appalachian State University. Ozone as a component of global change: impacts on Southern Appalachian plants and ecosystems.

Thursday, September 24th

Dr. Joe Bailey, University of Tennessee Knoxville. From microbes to mammals: the general organizational effects of plant genetic variation.

Thursday, October 8th

Dr. Jay Bolin, Old Dominion University. From fungus to foul flower: the ecology and evolution of the parasitic genus *Hydnora*.

Thursday, November 12th

Dr. Jennifer Schweitzer, University of Tennessee Knoxville. Are there ecosystem consequences to genetic variation in dominant plant species? A genes-to-ecosystem approach.
